Kahoot!

• Kahoot! is a **game-based learning** platform, used as educational technology in schools and other educational institutions.

Its learning games, "kahoots", are user-generated multiple-choice quizzes that can be accessed via a web browser or the Kahoot! app.

• Kahoot! can be used to review students' knowledge, for formative assessment, or as a break from traditional classroom activities. Kahoot! also includes **live** quizzes. This educational platform is similar to other technological learning tools, such as **Woolash, Socrative, or Quizlet**.

Create

Create a fun learning game in minutes – we call these "kahoots". The format and number of questions is up to you. Add videos, images and diagrams to your questions to amplify engagement.

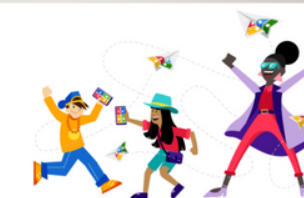

Play

Kahoots are best played in a group setting. To join a game, you need a unique PIN. If you're the game host, you need a big screen. Players answer on their own devices, while questions are displayed on a shared screen. In addition to live games, you can also send kahoot challenges that players complete at their own pace – for example, for homework or remote training.

Share

After a game, encourage players to create and share their own kahoots! With one of our premium plans for schools or business, you can co-create games with your colleagues and save time on finding relevant kahoots for your class or training session.

By teachers and students

Millions of teachers and students unleash the magic of learning with Kahoot! Introduce new topics, review, reward, and collect data for formative assessment.

By families and friends

Birthdays, weddings, holidays, game nights, family dinners, trivia – Kahoot! is the secret ingredient that will make any party or gathering even more awesome.
