2. Educacional App

Google Sites

- Google Sites is a structured wiki and web page creation tool included as part of the free web-based Google document editors package offered by Google. Google Sites is only available as a web app. The app allows users to create and edit files online while collaborating with other users in real time.

-

Forms

- **Google Forms is a search management application launched by Google. Users can use Google Forms to search for and collect information about others, and it can also be used for surveys and registration forms. The information collected and the results of the questionnaire will be transmitted automatically. In addition, Google Forms also has collaboration and sharing capabilities for multiple users.**

-

Excel

- With excel it is possible to perform mathematical calculations in an automated way, manage the accounting of a company, make reports, organize data in tables and even generate receipts and invoices

-

PowerPoint

- PowerPoint is used in presentations, whose purpose is to inform about a certain topic, and can use: images, sounds, texts and videos that can be animated in different ways. PowerPoint supports objects and includes a special text formatting tool, predefined presentation templates, a gallery of graphic objects, and a range of animation and slide composition effects.

-

Word

- Microsoft Word can be used to produce schoolwork and academic texts. With features comparable to other modern text editors, it also supports the addition and basic editing of images and text formatting.
-

Socrative

- App used for the creation of rooms, for the realization of quizzes.

Paint

- The paint used for the creation of simple drawings and also for the editing of images.
- Paint is also widely used for the creation of Pixel art, which is the "art of creating a pixel-by-pixel image" (raster), since it has good and practical tools for small-scale editing.
-

Canva

- Canva is a graphic design platform that allows users to create social media graphics, presentations, infographics, posters, and other visual content.
- Users can choose from many professionally designed templates, edit the designs and upload their own photos through a drag-and-drop interface.

Google Meet

Google Meet is a standards-based video conferencing app that uses proprietary protocols for video, audio, and data transcoding.

Microsoft Teams

- Microsoft Teams is a unified communication and collaboration platform that combines chat, video conferencing, file storage (including file collaboration), and application integration in the workplace.

Classroom

- Google Classroom is a platform created by Google to manage teaching and learning. The tool is a virtual space for teachers to teach their content and interact with students and parents.

-

Google Drive

- Google Drive is a file storage and synchronization service. Google Drive is now home to Google Docs, a range of productivity applications that offers editing documents, spreadsheets, presentations, and more. Google Drive is considered a "natural evolution" of Google.
