HOW TO USE GOOGLE APPS

Erasmus projesi "Digitalizasyon" kapsamında 4 öğrencimiz 25-28 Eylül tarihleri arasında Portekiz Fátima da Costa'da gerçekleştirilen faaliyetlere katıldılar.

"How to use Google Apps?" başlıklı faaliyet kapsamında Erasmus kapsamında eğitimci arkadaşlarımızın bir araya gelmesiyle gerçekleştirildi.
Etkinlikte Google uygulamaları ile ilgili ve bilgilendirici içerikler sunuldu.
Etkinlikte katılımcıların sorularına ve merak ettiklerine cevaplar verildi.
Etkinlikte katılımcıların sorularına ve merak ettiklerine cevaplar verildi.

5-EDUCATIONAL APPS

Why are educational apps important?

E-learning is gradually taking over traditional learning modes. The pandemic has given an immense boost to online education. Schools and colleges have started giving tasks that require the use of mobile devices. That's where educational apps enter the game.

Educational apps are available 24/7, unlike schools. As a result, learning with these apps is not time-bound learning, but students can study whenever they want.

LEARNING LANGUAGES

Duolingo

When it comes to language learning, Duolingo is one of the best options. You can get more than 100 courses on 41 different languages.

Especially since it's beginner friendly, it's definitely a good pick to start learning languages. You get rewarded for practicing daily, which in return encourages consistency.

Learn 33
languages for life

Easy to learn

Practice
conversations

New lessons
daily

Mondly

Mondly uses the deductive method to teach the language as quickly as possible. The structures you need to learn with example sentences are shown to you as a whole. In addition, you can strengthen your vocabulary by working with word cards with images on them.

Pratik yapın

Hızla akıcı konuşun

Günlük yeni dersler

Mondly Türkçe

Mondly is a great option for those who want to learn Turkish through English; creates an education system that teaches Turkish by writing, speaking and memorizing words. It increases memorability with pictorial and audio narrations and gives priority to words and sentence patterns that will be very useful during the day.

LEARNING MATHS

Mathway

Mathway is a math calculator for algebra, graphing, calculus, physics and many more.

You are given the option to either take a picture of the math question or type it in yourself if necessary/preferred.

The answers are provided in steps, which makes it easier to understand and apply the solution.

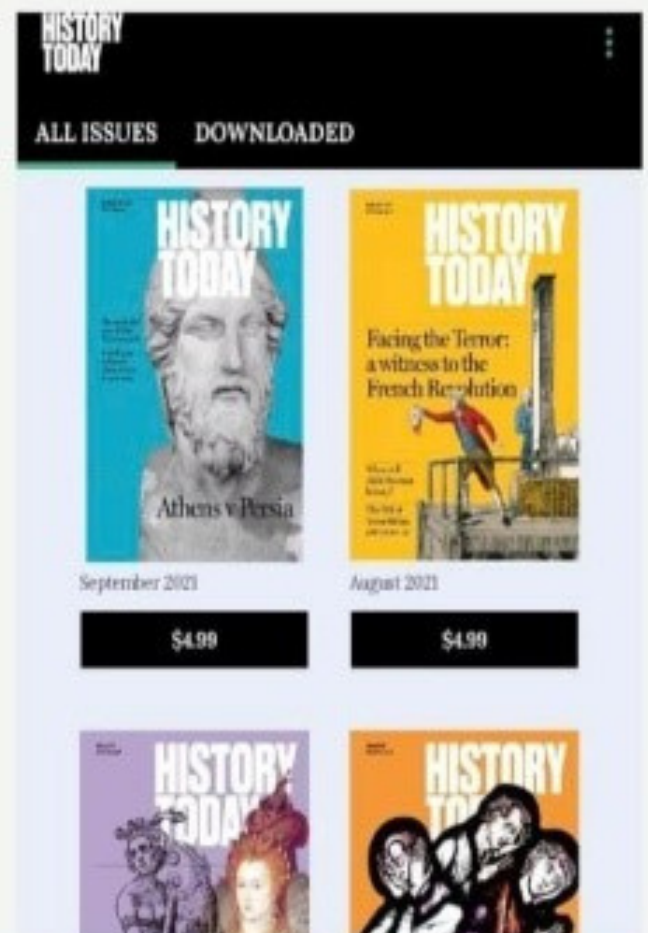

History Timeline

If you'd like a platform that focuses more on historical dates over anything else, try History Timeline. It puts all sorts of important events in a scrollable, dense timeline. You can zoom in to see more detailed info, zoom out if you prefer a more broad view of events, and tap individual entries to read even more about them. History Timeline attaches Wikipedia links if you want to read further.

History Today

You can find stories on topics like Tutankhamun, the succession of monarchs, democracy in Brazil, Eleanor Roosevelt, Kennedy and Churchill, and the Antikythera Mechanism with History Today app. Each magazine has been formatted specially for digital devices, like a smartphone or a tablet, so that it's easy to read wherever you are.

A hand holding a magnifying glass over a world map. The magnifying glass is focused on a specific area of the map, likely Europe or Africa. The text "LEARNING GEOGRAPHY" is overlaid on the image.

LEARNING GEOGRAPHY

A world map with a red dot indicating a location. The text "Seterra" is overlaid on the map.

Seterra

Seterra is a geography quiz app which efficiently teaches you the locations of all the countries around the world.

You can choose portions of the world to guess the countries of, and there are several modes with different things to guess.

The places you can choose range from the whole world to even national sports teams!

LEARNING ART & CULTURE

Google Arts & Culture

HOME EXPLORE MAPS MY ARTS

Google Arts & Culture

Categories

You can learn more about the world's most renowned artists with Google's Art & Culture app. The app illustrates stories behind historically popular artwork and the artist's cultural accomplishments. You can curate your favorite pieces of artwork and even take a virtual tour of some famous museums and cultural sites.

LEARNING SCIENCE

LEARN PHYSICS

INCLUDES ALL BASIC CONCEPTS

FORMULAS WITH EXPLANATIONS

Pocket Physics

Pocket Physics is an app that covers most formulas, equations and concepts of Physics.

When solving Physics questions you can get help from this app at any time, or use it to revise before an exam.

Offering detailed yet understandable descriptions of the topics, this is a must-have for students attending Physics classes.

Aktiv Learning

Aktiv Learning is an interactive chemistry app that gets rid of the static picture learning textbooks have and introduces a more engaging learning experience.

It introduces multiple choice questions about things that it has taught. If you get an answer wrong, it gives you feedback about why it is wrong and how it can be right.

You can experiment with the dynamic simulation system with elemental formulas.

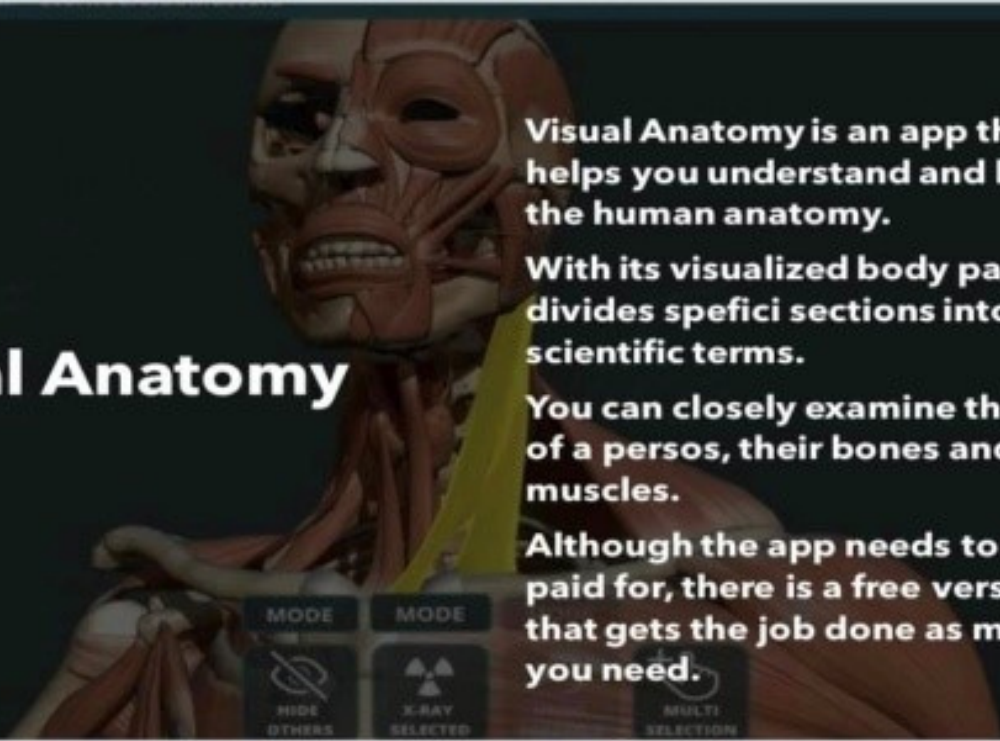

Visual Anatomy

Visual Anatomy is an app that helps you understand and learn the human anatomy.

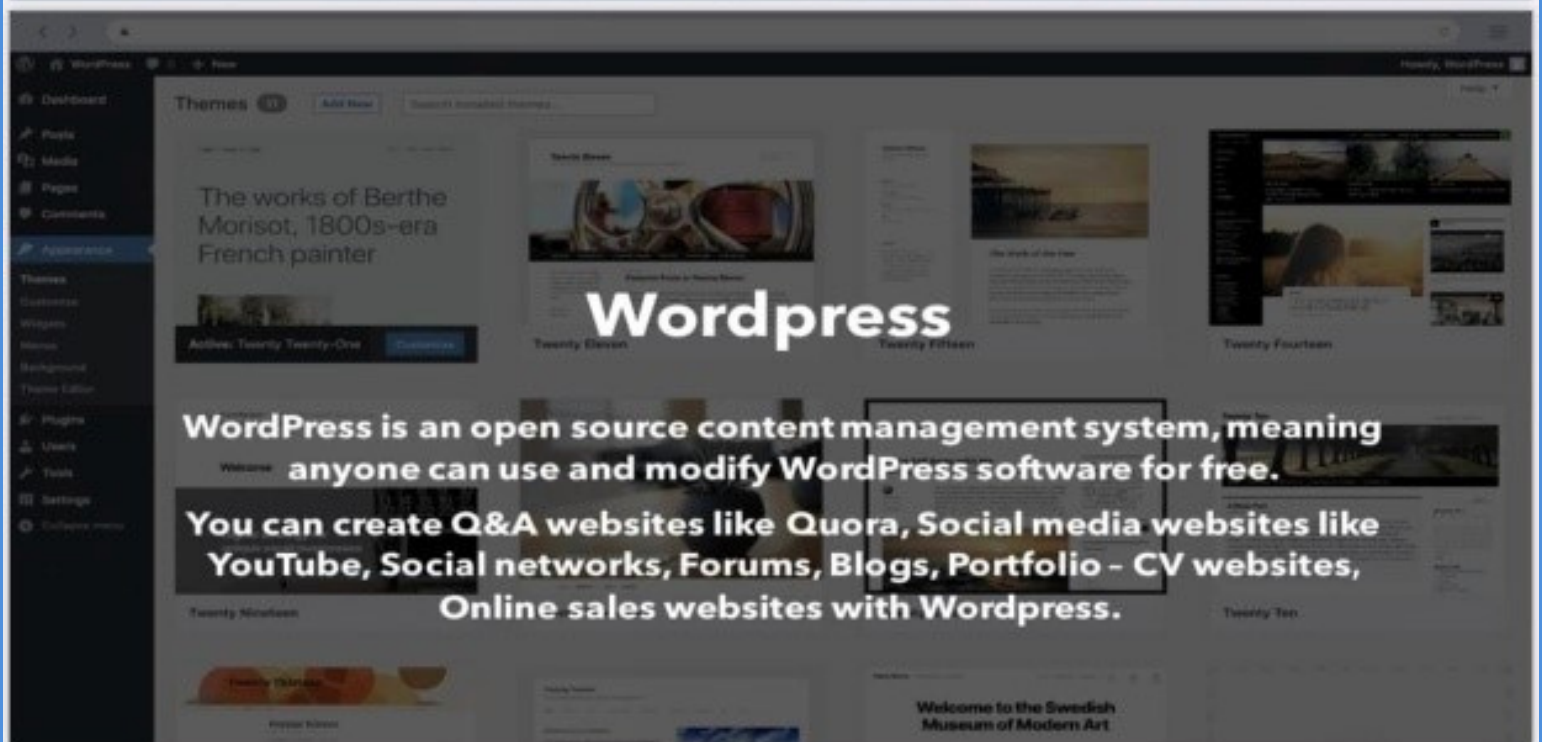

With its visualized body parts, it divides specific sections into the scientific terms.

You can closely examine the body of a person, their bones and muscles.

Although the app needs to be paid for, there is a free version that gets the job done as much as you need.

OTHER APPS

Wordpress

WordPress is an open source content management system, meaning anyone can use and modify WordPress software for free.

You can create Q&A websites like Quora, Social media websites like YouTube, Social networks, Forums, Blogs, Portfolio - CV websites, Online sales websites with Wordpress.

OTHER APPS

WordPress

WordPress is an open source content management system, meaning anyone can use and modify WordPress software for free.

You can create Q&A websites like Quora, Social media websites like YouTube, Social networks, Forums, Blogs, Portfolio - CV websites, Online sales websites with Wordpress.

DaVinci Resolve

DaVinci Resolve is a video editing software that's used by millions around the world because of the great user interface it uses.

Although it isn't the best for beginner editors, after getting used to it, it offers great proficiency that most other apps cannot.

Canva

Canva is a graphics design app that is widely used due to the easy-to-use tools and liberating comfort it gives.

Even for people that don't know how to use graphic design apps, this app is practically effortless to handle.

If you want to create great social media posts, videos or the like, this is an app that is for you!

Kahoot

Kahoot is a quiz app about any topic you can think of. If there isn't a quiz of a topic, you can always make one yourself!

Commonly used in classrooms, Kahoot is a very fun yet educating activity for students and teachers alike.

ChatGPT

ChatGPT

ChatGPT is an AI language model developed by OpenAI. It is a large, transformer-based neural network trained on a diverse range of internet text, designed to generate human-like responses to natural language inputs in a variety of contexts and genres.

ChatGPT can generate responses to prompts (a feature that could eventually challenge search engines) well enough to become an important tool for content generation; write and fix code, make calculations, translate information, and more.
